

Cabela's National Team Championship

Angler Diary

A cooperative effort between:

Welcome to Milford Reservoir!

Milford Reservoir is one of the premier walleye fishing lakes in Kansas and the Kansas Department of Wildlife, Parks and Tourism (KDWPT) appreciates your participation in this Angler Diary. The Cabela's National Team Championship (NTC) on Milford Reservoir will provide KDWPT a unique opportunity to understand:

- Preferred angling lures and techniques
- Number and size of fish harvested and released
- Population characteristics through a tagging study
- Aquatic Nuisance Species (ANS) precautions and preferred decontamination techniques, and
- Your expenses in the local area

Tournament anglers are some of the most conservation-oriented, avid anglers, so we appreciate your help in gathering this information. At the completion of the tournament, please return your completed Angler Diary to the registration table and you will be entered into a drawing for a Cabela's gift card. Angler Diary data will be summarized, so you will not be identified by your individual answers.

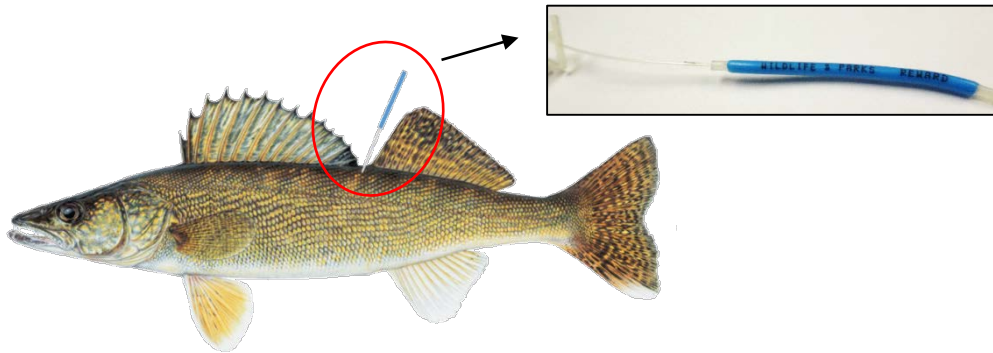

Thank you for your participation. Good luck!

Instructions:

Please record information in your Angler Diary throughout your time fishing at Milford Reservoir, including pre-fishing and tournament days. The Angler Diary is set-up for you to record your catches of individual fish (walleye and other species) each day. Please fill out a new diary page for each day fished. Each page has header information to fill out including: date, start and stop time fished, area fished, method used, type of lure or bait, and livewell treatment. For example, even if you used more than one type of bait, we want to know which one you used most often that day. Lastly, there are also questions about aquatic nuisance species (ANS) and your expenses for the tournament.

Please note:

A tagging study is being conducted at Milford Reservoir. Tagged walleye will have a blue tag inserted near the dorsal fin. If you catch a tagged walleye, please remove the tag and place it in the envelope in the back page of the Angler Diary. There are columns in the diary catch table to indicate if the fish was tagged. There is a reward for returning the tag. Your reward will be mailed to you after KDWPT receives and processes the Angler Diaries. You will need to provide your name and address below to receive the reward. It is extremely important that tags be returned for us to understand population characteristics of the walleye fishery. Contact the Emporia Research and Survey office at (620) 342-0658 if you have any questions about tagged walleye.

First Name: _____

Last Name: _____

Tournament ID #: _____

Team ID # or
Partner's Name: _____

Mailing Address: _____
Street address or PO Box ↕

City ↕ State Zip code

Check this box if you would like your diary mailed back to you. You will need to provide your mailing address above.

Check this box if you would like to see an electronic copy of the summarized results. You will need to provide your e-mail address:

Comments:

Aquatic Nuisance Species (ANS)

The decontamination techniques in the table below are various ways to help prevent the spread of ANS. Please complete the four questions in the table about these techniques by placing a ✓ in the box for all that apply.

| Decontamination Techniques | Which of these <u>did you know about before</u> fishing in this tournament? | Which of these <u>did you do before</u> launching your boat in Milford? | Which of these <u>do you plan to do after</u> leaving Milford and before launching your boat at another water? | Which of these <u>do you prefer to do to</u> prevent the spread of ANS? |
|----------------------------|---|---|--|---|
| Hot water wash | | | | |
| Pressure wash | | | | |
| Visually inspect | | | | |
| Remove debris | | | | |
| Bleach solution | | | | |
| Vinegar | | | | |
| Drain water | | | | |
| Pull drain plug | | | | |
| Let completely dry | | | | |
| No treatment | | | | |
| Other (please specify) | | | | |
| | | | | |
